Team Introduction

Mayur Raonang

- CSE major SPIT Mumbai
- AI/ML, full-stack development, backend architecture
- Focus: Agent engineering (RAG), backend systems, APIs, frontend integration

Siddarth Potdar

- CSE major + Finance minor, SPIT Mumbai
- Agent engineering (LangGraph), backend systems
- Focus: Agentic Workflow, financial modeling, system design, the Cognitive Financial Twin, simulation engine, architecture

We aim to leverage Agentic AI and financial foresight to make personalized financial guidance accessible, understandable, and actionable for individuals regardless of language, literacy level, or background

Problem Statement

The core problem is the absence of a scalable, context-aware financial guidance system that can understand diverse user realities and translate fragmented financial data into personalized, explainable, and actionable decisions.

Who Are We Solving For?

Segment	TAM	Primary Pain Point
Gig & Informal Workers	150M	Variable-income financial planning
Smallholder Farmers	100M	Scheme access and credit formalisation
Urban Salaried	80M	Retirement and investment literacy
Persons with Disabilities	30M	Accessible financial tooling

6 systemic gaps we aim to solve

Trust Deficit	Temporal Myopia	Bias Ecosystem	Localization Gap	Behavior Durability	Integration Gap
No trusted advisor	Short-term decisions dominate	Biases drive poor choices	Concepts lack local framing	Habits fail to persist	Disconnected financial ecosystem

Objectives

- To construct a dynamic user financial state model from heterogeneous financial inputs.
- To estimate near-term cash-flow trajectories under varying income and expense patterns.
- To identify financially vulnerable situations through risk and stress detection.
- To generate personalized recommendations across competing financial priorities.
- To evaluate multiple decision paths using scenario-based analysis.
- To provide transparent, context-aware financial guidance through an intelligent conversational system.

OVERALL SOLUTION

- ArthSaathi is an AI-powered financial co-pilot that uses multi-agent reasoning and probabilistic simulation to build each user's personal Cognitive Financial Fore-site.
- It generates future cash-flow projections, goal-achievement probabilities, risk estimates, and scenario-based outcomes.
- Users interact naturally to ask questions, explore alternatives, understand recommendations, and improve financial literacy.

Creates a conversational loop of exploration and learning without fear of judgement

Provides long term view with better more informed decision making

AIMS TO PROVIDE MAXIMUM UI BENEFIT TO PEOPLE WHO NEED IT THE MOST VIA VOICE AND SMS SYSTEMS

Core Innovation – Cognitive Financial Fore-site (CFF)

The CFF integrates transaction patterns, income dynamics, behavioural signals, life-event trajectories, entitlement eligibility, and socio-cultural context into a unified state model

Using Monte Carlo simulation, counterfactual reasoning, and multi-agent deliberation, the system projects personalized future-state distributions across multiple time horizons.

WORKFLOWS

HIGH LEVEL ARCH

-  Credit card Advisory
-  On Salary day flow
-  Future Salary estimation
-  Safety Council
-  Fraud Protection
-  Behavioral Council
-  Benefits/scheme Council
-  Goal Planning Workflow
-  Memory Re-evaluation

Example WORKFLOWS

CREDIT CARD ADVISORY AGENT WORKFLOW

CREDIT CARD ADVISORY CRITERIA

Category	Focus
Travel	Flights, Hotels, Lounge Access
Cashback	Direct Cashback on Spending
Shopping	Online & Retail Rewards
Lifestyle	Dining, Movies, Entertainment
EMI & Financing	No-Cost EMI, Payment Flexibility

Process of recommendation

Analyze Spending	Match User Profile	Recommend Cards	User Decision
Categorize expenses across merchants, travel, fuel, dining, shopping and subscriptions	Determine eligibility using income, spending patterns, existing cards and credit profile	Compare against card database and rank based on rewards, fees, benefits and expected annual value	Present top recommendations, explain benefits, and add selected card to user's financial profile

On Salary day Council Workflow

Positive Surplus	Negative Surplus
Build wealth through investments and goal planning	Restore financial stability through recovery planning
Asset allocation optimization	Expense and debt optimization
Monte Carlo future projections	Recovery strategy generation
Goal acceleration	Goal reprioritization
Recommendation → Memory Update	Recovery Plan → Memory Update

AI

Namaste! 🙏 I'm Artha AI. To guide you best, let me understand your situation. What is your approximate monthly income?

My income varies — around ₹15,000–18,000 per month from farming and some daily wage work.

AI

I understand — irregular income is very common! 🙌 Do you have any savings right now, even small amounts?

Yes, some savings

No savings yet

Not sure

Occupation	Farmer
State	Maharashtra
Income Bracket	₹25K–₹50K/mo
Land Ownership	Inferred (likely)
Aadhaar Status	Verified
Bank Account	Jan Dhan linked

WHY PM-KISAN?

Occupation as farmer in Maharashtra with income ₹35,000/month places you squarely within PM-KISAN criteria. The scheme targets small and marginal farmers with family income

Key Realization from Industry Expert Discussions

Through discussions with industry experts, we realized that solutions focused exclusively on low-income or financially underserved segments face significant long-term sustainability challenges. While such initiatives can create meaningful social impact, they often depend on CSR, grants, or external funding, making long-term scalability difficult.

To address this, we identified an opportunity to repurpose our core technology stack for the broader wealth management ecosystem. The same AI-driven financial intelligence framework can be adapted for investment planning, portfolio advisory, and wealth optimization use cases.

For institutions such as Nomura, this creates a pathway to leverage the platform beyond financial inclusion by training domain-specific models on global investment products, market data, and wealth management workflows, enabling personalized investment guidance and decision support for a wider customer base.

NOMURA

HOMEABOUT USRESPONSIBLE INVESTMENTFUNDS

Nomura Funds Ireland – Asia Sustainable Equity Fund

FundKey FactsDownloadSustainability-related disclosure

Overview

The Asia Sustainable Equity Fund is a concentrated Asia Pacific ex Japan equity strategy that seeks to deliver strong risk-adjusted returns through investing in companies that the fund believes to contribute or will contribute to solving social or environmental problems.

The fund target to achieve an excess returns of 2%-3% p.a. over the benchmark, measured over a 3-year rolling period, with target tracking error of 3%-10% p.a.

- SFDR* Classification: Article 9

* EU Sustainable Finance Disclosure Regulation.

Investment style

Our investment style is sector agnostic. We build an actively managed, high-conviction portfolio of 40 to 50 holdings. We focus on companies that the fund believes to provide a high overall positive environmental and/or societal impact (the environment, customers, suppliers, employees, society, and investors).

We consider every investment closely to ensure it is positively aligned with the UN SDGs aligned Impact Goals.

The strategy combines our Total Stakeholder Impact approach and longstanding core Asia ex Japan 'Country Centric Fundamental Analysis' investment process.

Our approach

- Each country specialist focuses on his / her respective market of expertise, understanding the country specific dynamics including ESG issues and incorporating these into stock selection decisions.
- A differentiated approach of identifying businesses and companies that the fund believes to contribute or will contribute to solving social or environmental problems based on our proprietary framework forms the initial basis for our stock selection process.
- Fundamental bottom-up analysis, based on material financial and non-financial aspects and combined with our Total Stakeholder Impact approach are core elements of the portfolio construction of 40 to 50 holdings.

Further details of the sustainability strategy are described in the tab "Sustainability-related disclosure".
